

Green Pricing Program Now Available

Beginning on January 1, 2004, Midland Power Cooperative began offering a green pricing program to our members. This program will allow individual customers the ability to voluntarily contribute to a fund. All of the money collected from customers will be used for the development of alternate energy production facilities in Iowa. Alternate energy production facilities may include wind energy, biomass, solar and other nontraditional generation technologies.

Through this program, customers will not be directly purchasing alternate energy, but rather participating in the development of these resources. Contributions may be retained until they reach a sufficient level to pursue a particular development, make a grant to another entity pursuing alternate energy development in Iowa, or arrange for purchases from alternate energy production facilities.

Once you have signed up, your participation will continue at the same level until you notify us that you wish to change the amount of your contribution or end your participation in the program.

If you have questions, would like to sign up, or would like more information about this program, please visit our Web site at www.midlandpower.com or call our office at (800) 833-8876 or (515) 386-4111.

Voluntary Contribution Form Midland Power Cooperative's Green Pricing Program
